

NEW!

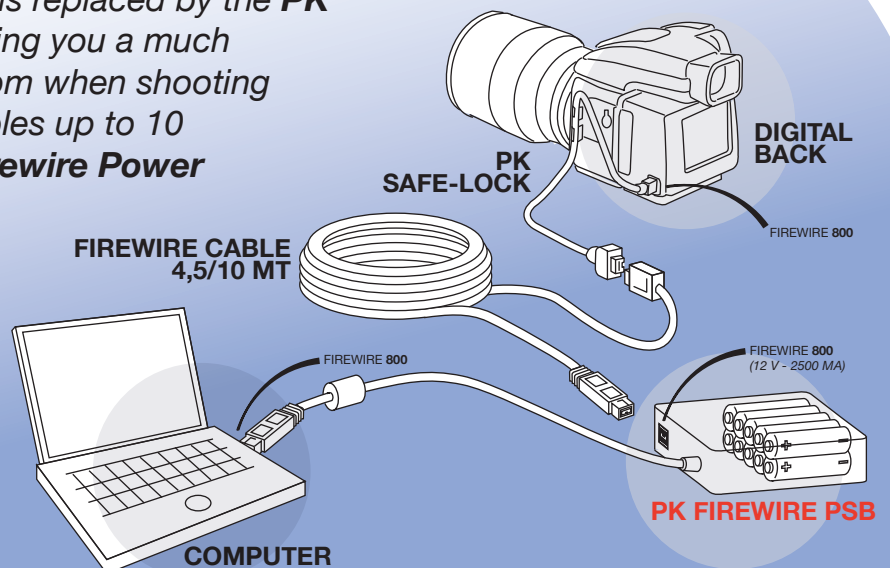

www.pk-digital.it

Our new **PK Firewire Power Supply Battery** device gives you additional energy needed to run digital backs and any firewire interface, when shooting tethered to your laptop computer.

The **PK Firewire Power Supply Battery** works as an energy replacement device, letting your computer battery to be used entirely for the computer activity. The noticeable drainage of the laptop battery used to keep the digital back or other devices running is replaced by the **PK Firewire Power Supply Battery**, giving you a much smoother workflow and lots of freedom when shooting on location. You can use Firewire cables up to 10 meters long. You can also use **PK Firewire Power Supply Battery** with PK Safe-Lock.
